

The bluetooth beacon for indoor location

e-BBE9 is a beacon designed and configured specifically to work with devices equipped with Emerit©, the application dedicated to the safety of professionals exposed to high-risk situations.

Combined with the Emerit© algorithm the e-BBE9 beacons allow a detailed and customizable indoor location according to the configuration of the site to be covered (floors, areas, corridors, etc...).

> Technical specification

CARACTERISTICS	
Range	about 20 metres
Protocol	iBeacon
Transmitter power	-4 dBm
Transmission interval	500 ms
Cell button battery (CR)	1000 mAh / replaceable
Robust housing	Screw or adhesive fixing
Bluetooth	5.0 (BLE) Low energy
Protection class	IP67
ON / OFF button	Inside
Certification	CE and FCC
Autonomy	more than 24 months
DIMENSIONS	
Diameter	49 mm
Width	66 mm
Thickness	17.5 mm
ACCESSORIES (supplied as standard)	
Screw	2 pieces
Adhesive	Double-sided
